A JOURNEY FROM CHRONIC PAIN TO COMPLETE RELIEF

Brajesh Khandelwal, a 45-year-old, had been enduring the agony of acute piles for the past 5-6 years. Despite seeking help from numerous specialists in Allopathy, Homeopathy, Ayurveda, and Naturopathy,

He only found temporary relief. The condition caused severe pain and bleeding, often significantly lowering his haemoglobin levels.

Everything changed when Brajesh discovered Dr. Ashok Ladha at Vishesh Jupiter Hospital, Indore. Dr. Ladha thorough examination revealed that Brajesh was not **only suffering from piles but also from an entwining of the intestine.**

On June 5, 2024, Dr. Ladha performed surgery using an ultra-modern stapler technique.

BEFORE

With more than 25 years of dedicated service towards his patients, Dr. Ladha established 'World Piles Day' in 2006, and the technique of Restorative Proctocolectomy for Ulcerative Colitis, in India.

He also established and published the technique of "SEPTA", for the surgical treatment of benign anal diseases.

Astonishingly, within just 24 hours post-surgery, Brajesh felt as if he hadn't undergone surgery at all. Dr. Ladha advised a brief three-day rest period, after which Brajesh was able to return to his normal life without any dietary restrictions. The minimal medication prescribed was discontinued after his first review on June 12, 2024, just one week post-surgery.
